7. For purposes of appeal, the proposed amendment(s): a) how the new or amended claims would be rejected is pro The status of the claim(s) is (or will be) as follows:	will not be entered, or b) worlded below or appended.	vill be entered and an	explanation of						
Claim(s) allowed:			•						
Claim(s) objected to: <u>66 and 67</u> . Claim(s) rejected: <u>37-40,54,59-65 and 68-82</u> .									
Claim(s) rejected. <u>37-40,34,39-03 and 68-82.</u> Claim(s) withdrawn from consideration:									
AFFIDAVIT OR OTHER EVIDENCE									
<ol> <li>The affidavit or other evidence filed after a final action, b because applicant failed to provide a showing of good ar and was not earlier presented. See 37 CFR 1.116(e).</li> </ol>	nd sufficient reasons why the affida	vit or other evidence	is necessary						
<ol> <li>The affidavit or other evidence filed after the date of filing entered because the affidavit or other evidence failed to showing a good and sufficient reasons why it is necessa</li> </ol>	overcome <u>all</u> rejections under appe	eal and/or appellant fo	ails to provide a						
10. ☐ The affidavit or other evidence is entered. An explanation REQUEST FOR RECONSIDERATION/OTHER	on of the status of the claims after	entry is below or atta	ched.						
11.   The request for reconsideration has been considered by	ut does NOT place the application	in condition for allow	ance because:						
See Continuation Sheet.  12. Note the attached Information Disclosure Statement(s)	(PTO/SB/08 or PTO-1449) Paper	No(s).	•						
13. Other:		(*/-							

Continuation of 11. does NOT place the application in condition for allowance because: Applicant has amended the base claim to recite that the immune response is "antigen-specific." This does not further limit the claim because the term "antigen" is broader than the term "epitope," as put forth in the ground of rejection. Reciting that the response is "antigen specific" does not rectify the issue of "epitope spreading" as put forth previously. As presently claimed the immune response can still escape control of the claimed method via epitope switching. Merely administering a single immune epitope will not control the immune response to other epitopes on the same antigen.
